

THE SOUTH LONDON MAGIC SOCIETY

June 2014 Card Capers

Our June meeting was a double card event beginning with a Card School which was followed by Card Capers. Gary opened the meeting reminding members that July's meeting will be the Stage Competition.

Anyone wishing to join in should email Gary.

Roy told everyone about Magic Mondays which is a weekly magic show in Leicester Square. The meeting was divided into groups of three for card capers and everyone taught each other their favourite card tricks.

This seemed quite popular and was a good opportunity for members to socialise.

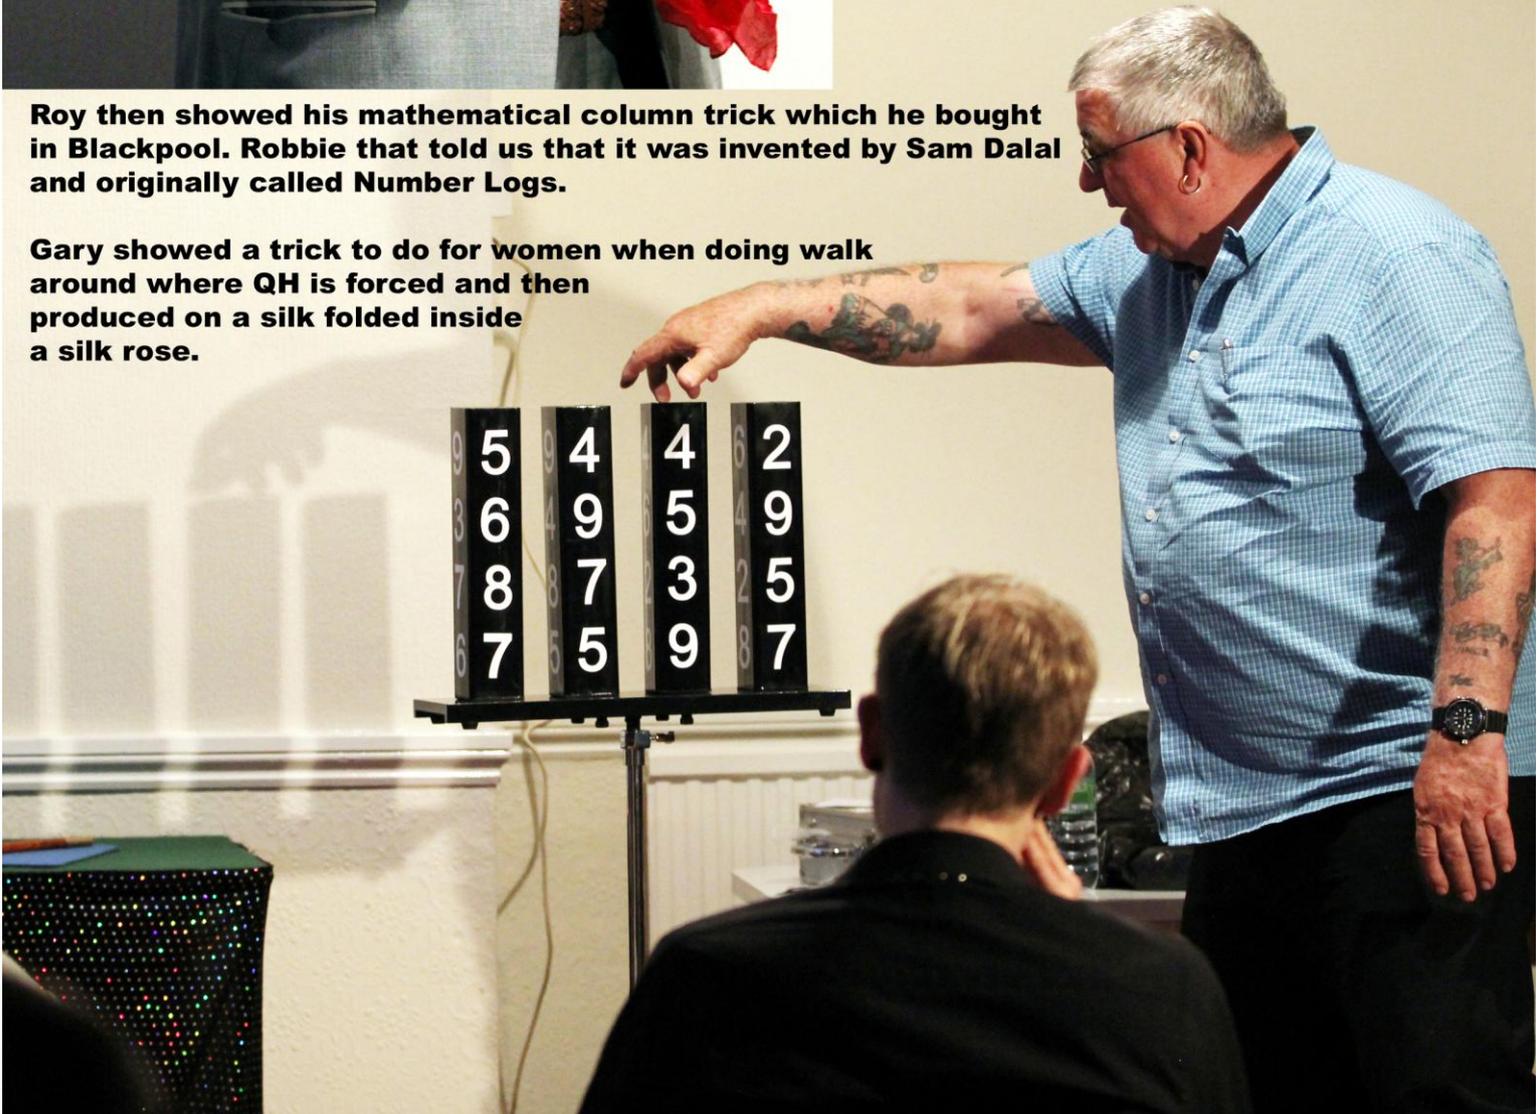

Roy then showed his mathematical column trick which he bought in Blackpool. Robbie that told us that it was invented by Sam Dalal and originally called Number Logs.

Gary showed a trick to do for women when doing walk around where QH is forced and then produced on a silk folded inside a silk rose.

Paul Jackson showed his Topsy Trick. Stuart picked a card which after overhand, riffle, Chinese and sloop shuffles was then found upside down when the cards were spread across the table.

Stuart Sanders asked Joe to deal off a chosen no. of cards then deal them into two packs. He put one iris pocket and shuffled the other pack into the rest of the pack. The cards from the pocket were shuffled and the pack put on top. Stuart used "sensitive fingers" to locate the named card which was the only upturned card.

Marcus showed his Lie Detector. He asked Jane to select a card and asked questions about the colour, suit etc. he then used the cards to spell her answers showing the if her answers were true or false.

Gary, a new member this evening showed his Irish Poker Trick where he turned 5 blank cards into 5 Aces.
